COMPANY INTRODUCTION

30 Years of Excellence in Outdoor Furniture Materials

Leisure Touch Rattan (Baihuiming) is a professional outdoor furniture material manufacturer, who has over 30 years of experience with 56000m² space, 165 machines and monthly output of 3500 tons. We are specialized in the material for synthetic rattan, plastic wood slat and plastic accessory.

Manpowered with an in-house designing and engineering team, we generate new developments on a regular basis. With 5000 molds, a wide variety of PE rattan and plastic wood slats are in place at any time for customers' selection.

With the use of the latest extrusion technology, our company requires a highly trained labor force. We consider the training of the staff of strategic importance. All kinds of training courses especially technical courses are provided on a regular basis.

Implementing intensive quality control, Leisure Touch Rattan (Baihuiming) meets ISO9001:2000 system standard. We apply AQL (Acceptable Quality Level) into all stages, ranging from IQC(Incoming QC), IPQC(In-Process QC), FQC(Final QC) and OQC (Outgoing QC). Each Quality Check is properly filed for easy reference and tracking.

MISSION

Mission

We are a contributor to the outdoor furniture industry with new materials, creative proposals and professional assertions.

Marketing Philosophy

Innovative, sophisticated and considerate.

Social Responsibility

Win-win situations with customers, suppliers and stakeholders.

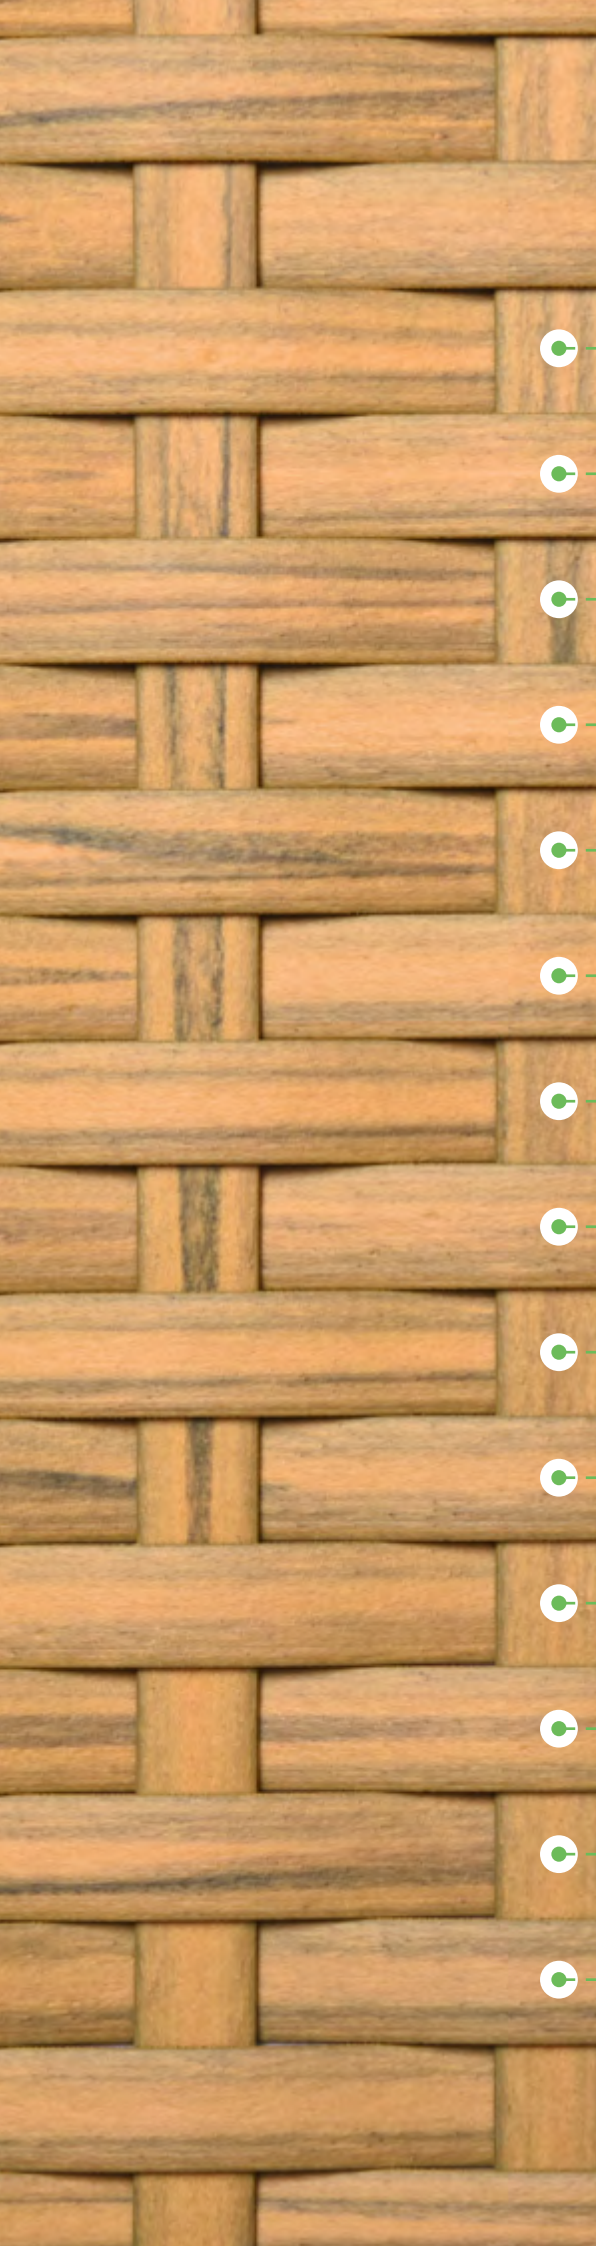

HR Philosophy

Growth-oriented and humane.

Vision

To be the most trustworthy rattan brand in the world.

MILESTONE

- Oct. 2, 1993** Our Factory was established.
- 1998** The R&D department was established with the goal of designing PE rattan material, plastic wood, and plastic accessories.
- 2002** The number of production machines reached 100.
- 2003** The LTR export department was established.
- 2004** A showroom and an in-house lab were set up.
- 2008** We started exporting plastic wood.
- 2009** The number of production machines came to 130.
- 2010** We provided on-site training service to help customers establish their rattan furniture factories.
- 2012** Rattan furniture factories were set up for customers in Georgia and Nigeria.
- 2015** Rattan furniture factories were set up for customers in Bolivia.
- 2019** Our monthly output has reached 2500 tons.
- 2020** The brand of LTR(R&D of furniture materials) was registered.
- 2021** New 56000m² factory with 165 machines has been in operation, capable of producing 3500 tons per month.
- 2023** New products were launched at Spoga Gafa: introducing our new collection of PE rattan designs.

CORE COMPETENCIES

- Biggest in China with market share of 45%
- Continual development of new PE rattan designs.
- 165 extruders with a monthly output of 3,500 tons.
- Customisation options are available.
- Free samples are also available.
- Hassle-free after-sales service.

PE Rattan derives from natural species such as banana leaves and water plants, and the natural smell is deeply loved by people. As far back as the 16th century, people used the rattan to make all kinds of furniture and utensils.

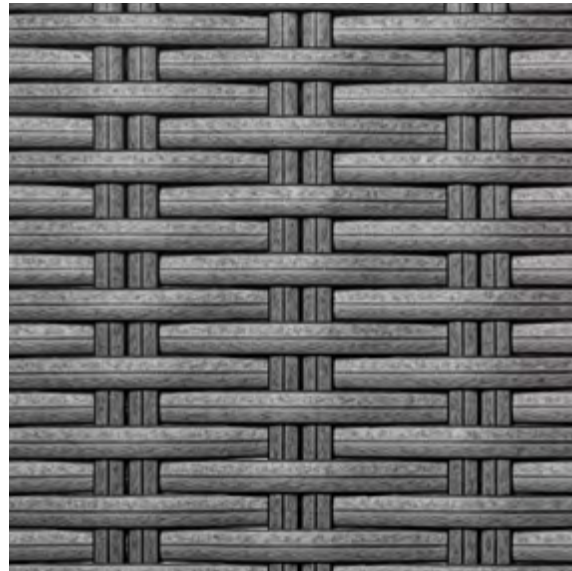

However, these natural crops cannot withstand wind or sun, rain or insect.

Benefited from the exquisite craftsmanship of modern technology, people have developed one kind of material which is closest to natural rattan material. It's called PE Rattan, which has the best of both worlds:

all-weather performance and closest outcome to natural rattan regarding shape, color, finish and texture. Leisure Touch Rattan is waterproof, durable, colorfast, pest-free and fungus-free. We can produce all kinds of shapes including flat, round, half-moon, twisted, seagrass and rope imitation.

It is an environmentally-friendly and cost-effective alternative to natural rattan.

● To stay ahead of changing market trends, LTR will continuously introduce new plastic rattan styles each year.

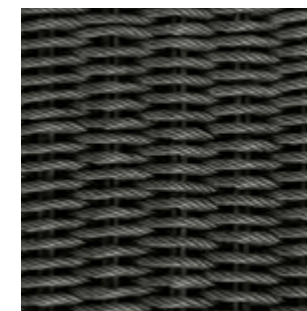

Twisted Collection

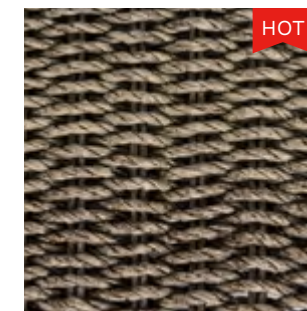

The collection of twisted plastic rattan includes two different types of craftsmanship: One is made directly by twisted moulds, and the other is made as twisted rattan by an additional twisting process after the regular PE rattan is made; making it an ideal option for decoration and furniture.

In terms of synthetic thatch, it has similar manufacturing processes to the plastic rattan, which is eco-friendly and can last a long time. It is crafted in the shape and look of real grass using a special craftsmanship skill, which is mainly used in engineering projects, hotel projects, and so on.

	LTR-T12						
	LTR-T13						
	LTR-T14						
	LTR-T15						
Carpet Type Thatch	LTR-T1	PE thatch straw with anti-aging & anti-UV ingredients + PP black base+composite cotton	Non-fire retardance	1*20m	20	34	6-8 Years
	LTR-T2		B1 fire resistance			35	
	LTR-T2		Non-fire retardance			37	

Non-fire retardance:
thatch contains a certain amount of flame retardant, but does not reach B1 flame retardant standard. So it protects against fireworks but not open flames.

B1 fire retardance:
thatch is in good fire retardant effect which is difficult to catch fire under open fire or high temperature. Even if it catches fire, the fire will not spread and will be extinguished as long as the fire source is removed.

The B1 fire retardant standard mainly includes three below indicators:
1. Oxygen index: ≥ 32.0%.
2. Vertical combustion performance: burning time ≤ 30S and burning height ≤ 250mm.
3. Smoke density level: ≤75SDR.

REMARK: Above items are in stock, MOQ for customized length is 300 meters.

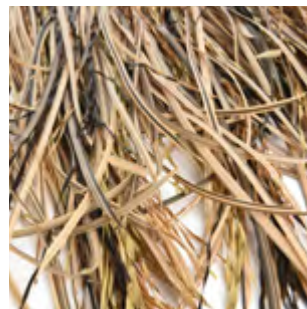

Wide Straw Thatch Application

- Project Item No.: LTR-T4
- Color: Straw Yellow
- Material: PE
- Fire Rating: Non-fire retardance
- Size(W*L): 0.5x3m
- Weight: 1.4-1.5kg/pc
- Warrenty: 2 Years

Narrow Straw Thatch Application

- Project Item No.: LTR-T13
- Color: Natural Wheat
- Material: PE
- Fire Rating: B1 fire resistance
- Size(W*L): 0.5×0.5m
- Weight: 0.2kg/pc
- Warrenty: 2 Years

Carpet Type Thatch Application

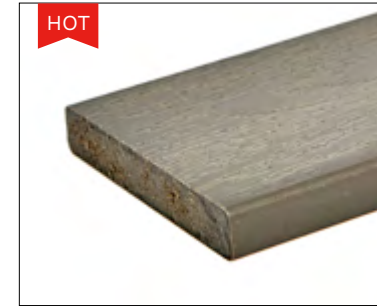

- Project Item No.: LTR-T2
- Color: Golden Yellow
- Material: PE thatch straw with anti-aging & anti-UV ingredients + PP black base+composite cotton
- Fire Rating: Non-fire retardance
- Density: 5320 needles
- Size(W*L): 1×20m
- Weight: 37kg/roll
- Warrenty: 6-8 Years

For outdoor furniture lovers who like nature, wooden furniture is the preferred choice since it is closely connected with nature. However, the indiscriminate cutting of trees has seriously damaged the ecological environment. Our customers care for forests as we care for our customers. As a new environmentally friendly material, plastic wood(made from PS, polystyrene)has the best of both worlds: all-weather performance and closest outcome to timber slats regarding shape, color, finish, texture and grain. Plastic wood has the advantages of UV-resistant, all weather, waterproof, moisture-proof, insect-proof, strong plasticity, high environmental protection, no pollution, recyclable, simple installation, no need for daily maintenance and longer service life than wood. We want to make the best plastic wood, to appreciate the environmentalists, making them enjoy the fresh, natural and outdoor plastic wood at the same time protect the environment at the most.

- With our sophisticated craftsmanship, we offer a diverse range of plastic wood boards with over 2,000 styles and various surface effects. Crafted from PS plastics and PE material, our plastic wood replicates the natural beauty of timber while delivering superior all-weather performance. Designed to meet various outdoor needs, our lumber is suitable for garden furniture and decorative features. With a minimum order quantity of 300KG, we provide reliable solutions for environmentally conscious projects. For more tailored customization services, please refer to the chart for size specifications, ensuring the perfect fit for your diverse applications.

Plastic Wood Description

SURFACE TREATMENT TYPE	SURFACE TREATMENT DETAILS	DESCRIPTION	FEATURES	INSTRUCTIONS
Pattern Engraving	Embossed	Concave and convex patterns are pressed out by the pressing wheel mould.	Concave and convex wood texture.	<p>Suggest clean immediately with detergent when there is stain.</p> <p>PS:Heat Transfer Print is easier to clean.</p>
	Brushed	Fine grain lines are created by the sanding belt to achieve natural wood texture.	Natural wood grain texture. Surface damage can be handled easily during transportation and uses.	
	Planed	Surface layer is planed away by the planer to be flat enough to reveal the wood grain in the recipe.	Achieve the effect of imitating real wood.	
Texture Creation	Print	Special ink is printed to achieve wood grain textures on the surface.	Various styles and effects. Common to have a little fading over long time.	
	Heat Transfer Print	Pattern of the heat transfer film is transferred to the target plastic wood under heat press. Through heat and pressure, the pigment ink on the pattern melts and penetrates into the surface of the plastic wood, making the pattern firmly attached.	Latest technology, various surface effects. Impermeable, easy to clean surface.	
	Overlay Color	Overlay pigment ink to cover the plastic wood surface color to create natural mix colors texture.	Original craftsmanship, retro and distressed. Common color variation in bulk production.

• Are you looking for one-stop solutions for your furniture or project constructions, Leisure Touch Rattan will assist you with its wide range of products and services, helping you create a serene and relaxing outdoor paradise with exquisite furniture. Do not hesitate and send us your unique quote today!

MARKET AND WHAT THEY CARE

Offering high-quality and exquisite plastic rattan and plastic wood to outdoor furniture factories and furniture material traders across Eastern Europe, Africa, Latin America, and South America. We aim to solve the problems that factories have, such as cost, delivery time, and product quality, with our strong production capacity. And make sure that traders have no concerns about price stability, after-sales service, and product diversification. We are dedicated to bringing a healthy, leisurely, and environmentally friendly outdoor lifestyle to valued end users.

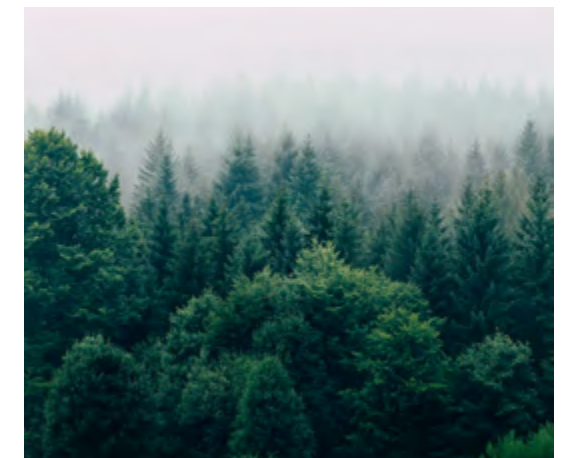

Plastic rattan

Weaving is the foundation of all things, the endless outdoor background colour, the rhythm of the morning dew, the gentleness of the afternoon sun and the embrace of the peaceful night; it is just like the dawn, shining on every corner of our outdoor living. Weaving is the gift of nature; movies, novels and life are all inseparable from it. Our plastic rattan is woven with exquisite weaving craftsmanship. Let's picture a wonderful life together with our weaving material and bloom the eternal charm of outdoor living.

Plastic wood

People's love for wooden furniture has never waned, yet real wood materials are inseparable from the sacrifice of each tree. Excessive deforestation has now led to environmental destruction. At this moment, plastic wood emerges as an eco-friendly and sustainable alternative for outdoor furniture lovers while highly mimicking the natural grains and texture of real wood. Our plastic wood is not only an aesthetic and durable outdoor material but also proof that showcases humans' affectionate love for the environment.

FAQ

About Ordering:

Q1 Could you send me all of your samples?

A Free samples are available anytime. However, less is more. We will help you determine what samples are necessary instead of sending you all our 5000 samples.

Q2 Can you make prototype as per my samples or requirements?

A With a professional and sophisticated R&D team, we initiate new designs every quarter, which enables us to prototype your samples effectively and efficiently with a minimum similarity of 95%.

Q3 Can I make a trial order?

A Yes sure. A trial order starts from 300kg/model or you can simply select some in-production models at 50kg/model.

Q4 How about the delivery time?

A In most cases, the delivery time is expected to be 20-25 days for a 20'GP and 20-30 days for a 40'HC. If you have an urgent order, please let us know and we will fully cooperate to deliver the goods on time.

Q5 Can you tell me about popular rattan for my market?

A Our sales team has proven expertise in understanding different markets and countries. Please feel free to contact us at any time for consultancy purpose. Currently, our top 3 markets are Southeast Asia, South America and Africa.

Q6 How many years warrenty for your rattan material?

A We have 2,3,5 years warrenty at the moment.

Q7 How can i understand of different years warrenty for rattan material?

A When we are talking about warrenty, it refers to the weather resistance of the product when it is used outdoor. It is mainly determined by the different formulas and raw material used in production.

Q8 What is the application of the plastic wood? How long can it be?

A Normally for furniture production, which can be used indoor and outdoor. normally we can make as long as you want, but we suggest you consider the wood width and thickness, also transportation to decide the plastic wood length. Contact us for more info.

About Usage and Applications:

Q1 How many meters does 1kg rattan have?

A It depends on rattan sizes and shapes. Take flat rattan of 8*1.3mm for example, 1kg is about 120 meters. For more metric conversion, please inquire us accordingly.

Q2 Can the rattan use for ceiling or wall decoration?

A Yes, our rattan can not only use for furniture, but ceiling, wall decoration with our rattan weave/ rattan roll. Contact us for more applications. We have more items to meet your needs.

About Training and Agent Recruitment:

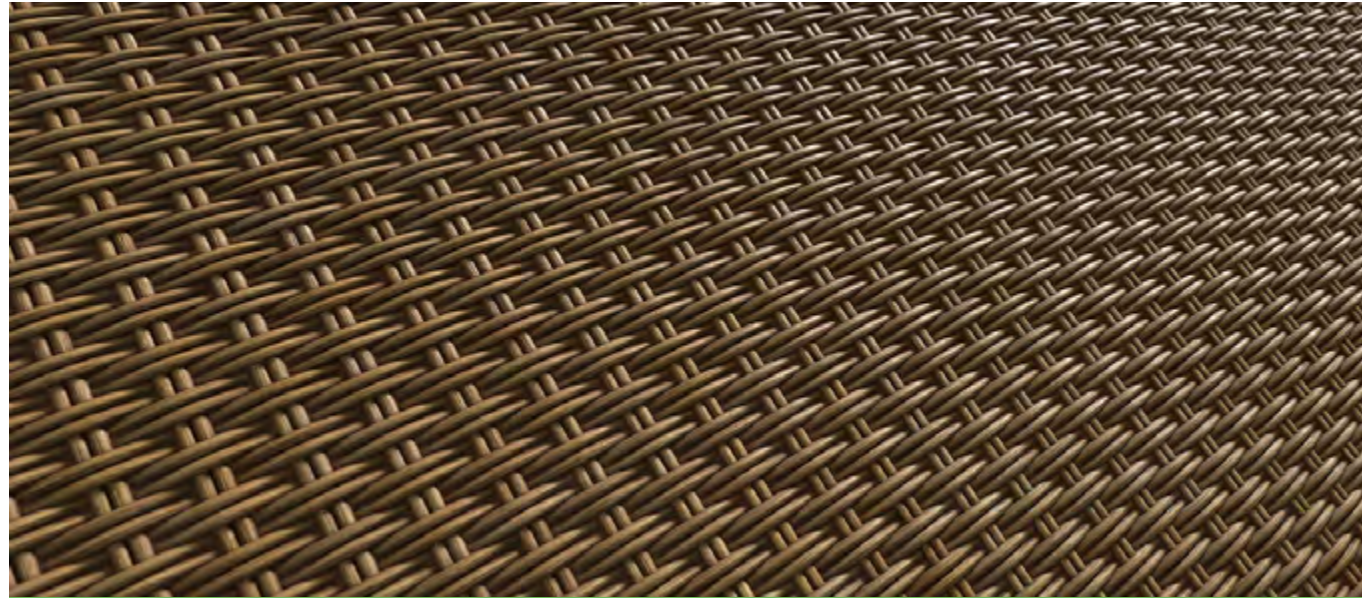

Q1 Could you help me with the furniture weaving?

A Yes, we do offer weaving training service to those who want to set up their rattan furniture factories.

Q2 Can I become your exclusive agent? How many containers do I need to order before being the agent?

A Yes, we are constantly developing strategic partners. The exclusive agents will be entitled with a variety of priorities, premiums and supports. You are most welcome to contact us for greater details.

MAINTENANCE

Rattan products maintenance instructions:

1. Prepare a gentle solution by mixing warm water with a mild detergent. Use non-foaming cleaner and non-foaming water on rattan furniture since a foaming product will leave residue in the gaps of the weave.
2. Use a soft cloth or sponge to gently wipe down the surfaces of the rattan furniture, ensuring thorough coverage. This step effectively removes surface dirt and dust accumulated over time.
3. For more stubborn stains or grime, a soft-bristled brush or sponge can be employed.
4. When you scrub the affected areas, please remember to clean them carefully with gentle pressure since doing it too hard will damage the delicate rattan material.
5. Rinse the furniture thoroughly with clean water to remove any residual soap or detergent, and then gently dry it with a soft rag.
6. Furthermore, protective measures such as applying a coat of clear varnish or sealant can shield the rattan against moisture and UV exposure.
7. Avoid collisions and scratches from sharp objects or hard materials. Be cautious not to expose rattan to high temperatures, as heat can cause it to soften and deform.
8. Whether in use or storage, keep rattan furniture away from fire, heat sources, and long-time sunshine exposure.
9. If it is not in use for a long time, it is recommended to cover your rattan furniture with a protective cover or relocate it to a storage room to preserve its quality.

Plastic wood maintenance instructions:

1. Avoid collisions and scratches from sharp objects or hard materials. Keep away from heat sources.
2. Avoid exposure to sunlight for a long time since the high temperature will cause the plastic wood to soften and deform.
3. If there are stains on the surface, clean it with appropriate detergent and wipe it dry with a dry cloth.

Here are some tips about the cleaning process:

- Quickly remove loose dirt and debris with a dry vacuum.
- Mix the dish soap and warm water in a container.
- To clean and sanitize, add a small amount of bleach. We recommend 1 portion of bleach with 2 portions of water. (Optional step)
- Use a washcloth to apply the soapy water to the plastic wood and let it sit for a few minutes.
- Gently scrub the surfaces using a soft brush to loosen and clean off any dirt or debris.
- Rinse your furniture with clean water, wipe it dry first with a dry cloth and let it dry in the air.

FACTORY SET-UP TRAINING

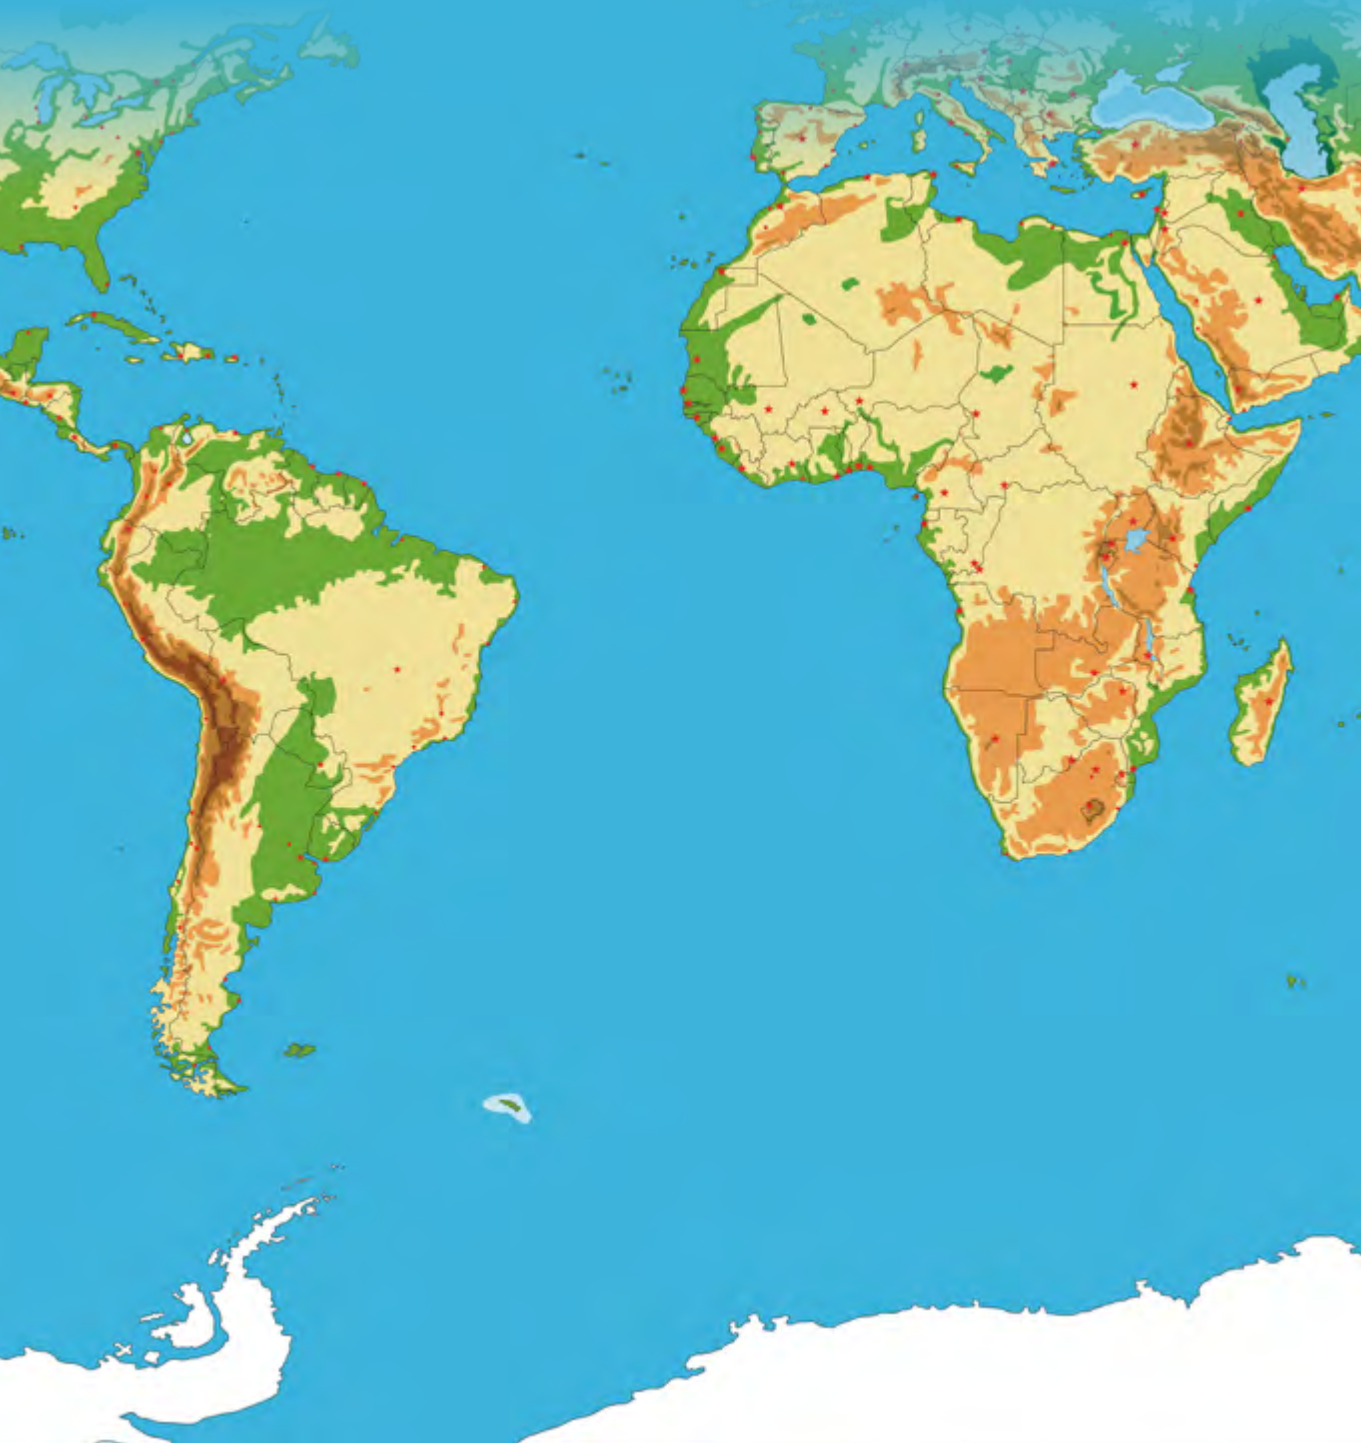

We have extensive experience in helping customers establish their rattan furniture factories. Our projects include on-site training by experienced trainers, complete sourcing of machines, and a reliable supply of high-quality materials for outdoor furniture.

Help you set up your furniture factory!
Outperform 99% Competitors

TARGET CUSTOMERS

LTR's target customers include outdoor furniture factories and furniture material traders in Eastern Europe, Africa, Asia and Latin America.

BRAND STORY

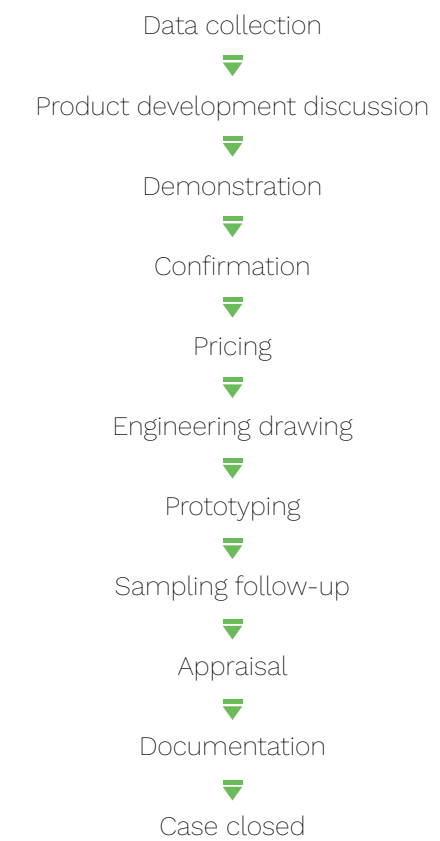

Leisure Touch Rattan positions itself as the most professional, innovative, and responsible outdoor furniture material supplier in China. Judy Wei, the founder of Leisure Touch Rattan, established this brand when she foresaw the necessity of embracing nature in creating outdoor living styles. People have become increasingly conscious of the importance of being connected to nature and protecting it for future generations. Leisure Touch Rattan aims to promote an eco-living style by manufacturing 100% recyclable rattan and plastic wood materials in a low-pollution production cycle. We care not only for people's comfort and health when using outdoor furniture but also for our artisans' working conditions. Therefore, we are cautious about the material formulas and ensure our artisans have a healthy working environment. In summary, we truly believe that we create comfortable and eco-friendly outdoor furniture materials to protect the health of future generations.

PRODUCT DEVELOPMENT

Technical Barriers

- Patents for Rattan Utility Model
- Exclusive formula
- Equipment independently developed
- 18 types of original design rattan release
- Compliant with US Class A Flame Retardant Standards

Product Development Process

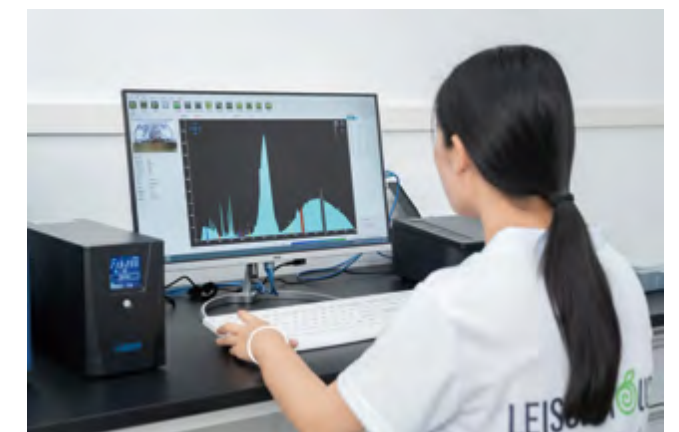

- 1. Sample customisation:** We have served domestic and foreign customers for more than 30 years, and can restore your samples with the fastest consistency.
- 2. Co-creation mode:** As long as you provide your creative inspiration, our sample preparation masters can help you transform it into products to the greatest extent.
- 3. Original model:** We have insights into market opportunities and trends. Our company will continue to launch original designs to meet the needs of advertising designers and cutting-edge furniture companies.

1. Development Capacity: We aim to develop one to two new rattan designs every month to stay on trend with the market.

2. Laboratory Machines: We own a comprehensive collection of laboratory testing machines, including an intelligent salt spray tester, tensile tester, temperature and humidity chamber, RoHS Halogen detector, single-arm drop tester, melt flow indexer, and UV tester.

3. Engineering and Production: We pride ourselves on having a meticulous production process for our rattan rolls. Our production flow includes the following steps: raw material preparation and mixing, extrusion and cooling, rolling, and packaging.

4. R&D Team: Our research and development team consists of five members. Each team member possesses rich experience in this field, a passion for product innovation, and strong execution abilities.

QUALITY

Leisure Touch Rattan meets the ISO9001:2000 system standard through intensive quality control. We apply the Acceptable Quality Level (AQL) to all stages, including Incoming QC (IQC), In-Process QC (IPQC), Final QC (FQC), and Outgoing QC (OQC). Each quality check is properly documented for easy reference and tracking.

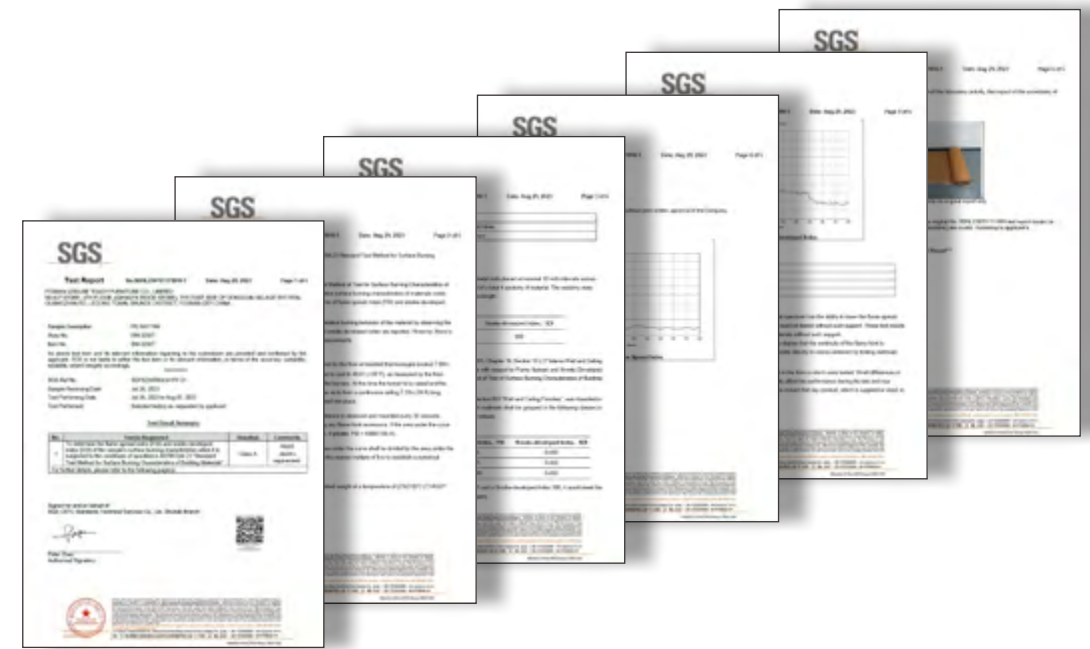

SERVICES

1. We provide on-site factory set-up training services to assist customers in establishing their rattan furniture factories.
2. Our professional customisation service allows customers to choose their desired sizes, colours, patterns, textures, and other design options.
3. Customers can request free samples for reference before placing bulk orders.
4. Our high monthly output guarantees on-time delivery, saving time for our clients.
5. We provide export assistance services, including customs clearance, shipping, and export document processing to ensure a seamless export process for our clients.

PATENT CERTIFICATIONS

With multiple design patent certificates, GRS (Global Recycling Standard, Outperformed 97% competitors), SGS, RoHS and REACH and US Class A Flame Retardant (Outperformed 95% competitors) certificates, we assure you that you will be satisfied with our high-quality outdoor furniture materials.

DESIGNER

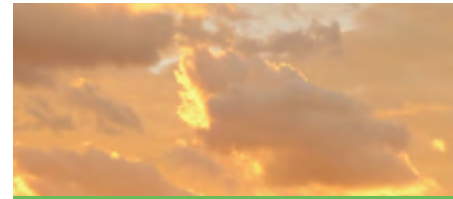

Rattan designs are the perfect combination of natural aesthetics and human craftsmanship. Our inspiration comes from nature, and we strive to create works that harmonise with the environment.

Ben Chen

Chief Designer

DESIGN CONCEPT

Environment Collections

Plants Collections

Inorganic Collections

To offer customers original, innovative, and high-quality PE rattan designs, we are proud to present our new Rattan Collection 2023.

This collection is classified into three categories: Environment, Plants, and Inorganic. Each category features distinct designs that share four major characteristics: colourful, natural, diverse in surface effects, and with a unique story behind it.

- Images and sizes shown in this catalogue are indicative only. In case of any inconsistency between the image and the actual product, or any difference between the size in the catalogue and the actual size, the latter shall govern.
- Please note that all the photos displayed in our catalogues and on our website are protected by copyright law. Without written permission from Foshan Leisure Touch Furniture Co., Ltd., no one is allowed to copy, distribute or use these photos.
